## Water Pump for Detroit Diesel Series 60<sup>®</sup> diesel engines.

Nu-Line Heavy Duty is pleased to announce the availability of rear mount water pump 123522707 for Detroit Diesel Series 60 Engine applications.

The water pump is a wearing part that should be replaced periodically and/or when overhauling the engine. Including a water pump when selling an overhaul kit ensures that your customer gets optimum life from his engine overhaul. Be sure to ask your customer about his water pump when selling overhaul kits and components.

Orders for these water pumps can be combined with Nu-Line stocking orders. Be sure to add these fast moving parts to your next Nu-Line Order.
